Inventory of SIAST Approved Programs as of September 2004

Overview

1. Explanatory Notes

The *Inventory of SIAST Approved Programs as of September 2004*, includes all approved programs and the credential awarded upon completion. The following is an explanation of how the programs are set up:

- a) Programs with multi-site offerings are considered one program. For example, Welding in the Industrial Division (page 4) is offered at Kelsey, Palliser, Wascana, and Woodland Campuses. Each location offers the same credential (certificate), so these are considered the same program and counted as one.
- b) Eleven programs have more than one credential and are considered separate programs. The following programs have a combination of the applied certificate, certificate, advanced certificate, and diploma credentials and each credential is considered a separate program – therefore 25 programs:

• Process Operator	Applied certificate (3) /certificate
• Human Resource	Certificate/advanced certificate/diploma
• Chemical Dependency Worker	Certificate/diploma
• Early Childhood Education	" "
• Graphic Arts Production	" "
• Media Arts Production	" "
• New Media Communications	" "
• Power Engineering	" "
• Rehabilitation Worker	" "
• Water Resources Engineering	" "
• Youth Care Worker	" "

- c) The program inventory is listed by division. A sub-total of the programs is provided at the end of each division.
- d) Funding for SIAST programs is provided in one of three methods: core, cost recovery and extension. The method definitions are:
 - i. CORE...refers to programs that are planned and delivered on a regular basis, at a SIAST campus location and are the responsibility of a SIAST program head. Funding is covered through the SIAST budget.
 - ii. COST RECOVERY...refers to programs that are planned and delivered on a regular basis, at identified locations, with published start and end dates, and are the responsibility of a SIAST program head. These programs are not funded through the SIAST base budget.
 - iii. EXTENSION...refers to programs that are not regularly scheduled but offered as requested. These programs are generally the responsibility of a SIAST extension education consultant who works with industry. These programs are not funded through the SIAST base budget.

2. SIAST Approved Programs

Overall, SIAST offers **173 programs** for which a credential is awarded for completion; 27 apprenticeship programs and the first two years of the NEPS degree program. The credentials for these programs are:

Apprenticeship Training Programs Offered at SIAST 2003-04: Total = 27

These programs are not totaled with the SIAST approved program listing in the previous pages.

Apprenticeship training programs are those where employees are indentured as apprentices to work in industry and learn a trade to gain journeyperson status, while at the same time completing determined periods of training at SIAST.

As well as SIAST, additional apprenticeship training is conducted by other education facilities in the province.
